Yandex • Frontend Developer	Январь 2019 - Октябрь 2019
---	----------------------------

6/28/22, 8:43 PM

Igor Polyakov

<> Продуктовая компания
B2B
B2C

Development of Yandex.Translate interface, infrastructure, and integration with other services (SERP, Yandex.Music and Yandex Mobile App). Modernized development approach at Yandex.Translate team: developed transition workflow from using single js-file at ES5 to webpack-based project at ES6 with babel, eslint, and live-reload. Actualized old unused unit- and UI-tests, added some new ones and integrated into bundler. Added error and performance monitoring system at frontend.

JavaScript UX/UI Webpack Babel Eslint ES6

Neurodata Lab • Full Stack Developer

Development of Emotion Miner platform (an "Amazon Mechanical Turk"-like service) for emotions marking at YouTube videos. Any person can sign up to the platform, pass a short test and a training on emotions annotating. And after that he can start working and withdraw money for markup. Implemented support for webcam, recording the emotional state of a person marking a video. There are over 60k people registered and working at the platform. Platform was available at Web, iOS and Android devices.

Android iOS

Апрель 2017 - Октябрь 2018

1 год и 7 месяцев

UChi.RU • Front-end разработчик; разработчик внешнего интерфейса

EdTech
B2C

Developing interactive lessons for pupils using CoffeeScript.
Produced a several frequently used functions such as drag&drop, animation of an object via Bezier path, layout grid.
Editing the other programmer's code.
Created a fancy documentation (based on JSDoc) on the existing functions, methods and classes.
Slightly improved development environment.

Верстка CoffeeScript

Июль 2016 - Сентябрь 2016

3 месяца

Moscow Institute of Physics and Technology (State University) - MIPT, Phystech • Project Manager

Образование
B2C

Developed design and technological standards for creating MOOC synopses of video-lectures. Created and managed a team which made more than 400 abstracts.

Июнь 2014 - Май 2015

11 месяцев

Moscow Institute of Physics and Technology (State University) - MIPT, Phystech • Web Developer & Designer

Образование
B2C

Designed and developed a couple of web-sites. Designed and illustrated one scientific learning book.

Март 2014 - Март 2016

2 года и 1 месяц

Moscow Institute of Physics and Technology (State University) - MIPT, Phystech • Scientist & Developer

Образование
B2C

Developed and visualized:
- thrust-only-based navigation and attitude control algorithm (USTO) for ISS
- satellite antenna targeting to other satellite retranslator algorithm
- simulation of spacecrafts docking. Developed an algorithm of computing a scattering phase diagram of any object
- sun beams atmosphere refraction model

Октябрь 2013 - Октябрь 2018

5 лет и 1 месяц

The University Centre in Svalbard (UNIS) • Web Developer

Design and development of electronic room for scientific community with in-built file-exchanger, library, news engine and a huge system of useful links.

Room

Октябрь 2012 - Ноябрь 2014

2 года и 2 месяца

RSC "Energia" • Scientist & Developer

Гос сектор
Производитель товаров
B2B

Development of mathematical models and algorithms of ISS-orientation and aiming of the satellite dish.

Algorithms

Сентябрь 2012 - Июль 2016

3 года и 10 месяцев

Freelance • Full Stack Developer #фриланс

Design and development web and mobile apps; teaching students programming and design.

Mobile Applications

Январь 2009 - Январь 2018

9 лет и 1 месяц

Образование

Moscow Institute of Physics and Technology (State University) (MIPT) Doctor of Philosophy (PhD)	2016 - 2020
Moscow Institute of Physics and Technology (State University) (MIPT) Master's degree	2014 - 2016
Moscow Institute of Physics and Technology (State University) (MIPT) Bachelor's degree	2010 - 2014
